

Galvanized Iron Wire

Materials:

Low carbon steel, medium carbon steel or high carbon steel

Finishes:

[Hot dipped galvanized](#), [electro galvanized](#), PVC coated, [black annealed](#), bright galvanized or oil painted.

Wire Diameter: from BWG 8# to 34#.

Applications:

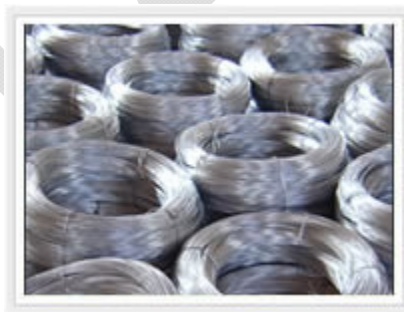

Sunshine **Galvanized Iron Wire** is widely used as wire for meshes, spring wires, rope wires, knitting wires, scrubbing wires, wire for control cable, wire for braiding hoses, wire for conveyor belts, wires for welding, nail wires.

Besides, this kind of product is used in weaving of wire mesh and fencing for expressway and construction.

We can manufacture different kinds of **galvanized iron wire** according to customer's specific requirements.

Electro Galvanized Iron Wire

Electro Galvanized Iron Wire

Electro Galvanized Iron Wire

Materials:

The main materials of electro galvanized iron wire are carbon steel wire and mild steel wire.

Process:

Electric galvanized iron wire that we produced usually goes through standard processes under careful control from steel rod coil, wire drawing, annealing, rust removing, acid washing, boiling, drying and zinc feeding to wire coiling.

Characteristics:

Sunshine Electro Galvanized Iron Wire enjoys many excellent characteristics, for example, rust resistance, alkali resistance, good corrosion resistance, thick and firm zinc coating, beautiful outlook, long service life and versatile in applications.

Forms of Supply:

Galvanized iron wire can be supplied in the form of coil wire, spool wire or further processed into straightened cut wire or U type wire.

Packing:

This kind of product can be supplied in coils or spools. Single coil package can be as small as 10 kg and up to maximum 1000 kg per coil.

Anping Sunshine Metal Product Factory manufacture excellent hot-dip galvanized iron wire from choice low carbon steel wire, through the process of wire drawing, acid washing and rust removing, annealing and coiling

Characteristics:

Sunshine **Hot Dipped Galvanized Iron Wire** enjoys many excellent characteristics, for example, rust resistance, alkali resistance, good corrosion resistance, excellent flexibility and softness, thick and firm zinc coating, beautiful outlook ,long service life

and versatile in applications.

Forms of Supply:

Hot dipped galvanized iron wire can be supplied in the form of coil wire, spool wire or further processed into straightened cut wire or U type wire.

Applications:

This kind of industrial wire is mainly used in construction, making of wire nails and wire ropes, express way fencing, binding of flowers and wire mesh weaving.

Specifications:

Serial Number	SIZE	Diameter(mm)	Standard Bundle Weight (Kg)
1	8#	4.0	50
2	10#	3.5	50
